Mr. Stannard

Planning officer

HPK/ land east of Thornsett Band Room Thornsett Trading Estate
Planning application number HPK/2023/0022

Dear Mr. Stannard

I am writing this letter to (object) about the planning application to erect a 2.4m high fence Down the side of the access road to Thornsett Trading Estate.

There is already a fence in place that is sufficient to stop trespasser's of said land.

A 2.4m fence is totally out of character for the rural area and will be an eye sore to the area.

At the moment we can keep watch over the said land for any fly tippers that may decide to dump rubbish, if the 2.4m fence is erected who knows what will be hidden.

Also, trees will have to be cut down and branches chopped off to accommodate new fence, We all know trees are a valuable asset to the country side and wild life.

I have lived hear for 28 years and and all of a sudden someone wants to erect a ridicules fence totally out of character.

Also, the person applying for permission to erect the fence, has been bulldozing loose materials, trees branches and soil to the side of the river bank, elevating the river bank and making it very steep,

This river might not be a very big river but does get extremely high when there are storms, therefore the river bank will become unstable and wash away downstream.

Passing this problem to someone else.

My wife and I strongly object to the proposed planning application.

Graham and Lynda Hadfield
