Submission: Neither

Comments: I view this application with great concern because of the danger that the flooding issues in the area, already high risk, will be increased. The proposals as they stand will not be sufficient to cope with the increased run off of water that could/ will lead to the flooding of the area around Brooklands and Charles Street, also the bottom of Nunsfield road and Lightwood Road. There is also a substantial risk that there will be flooding further along the watercourse. This is already an area with a high risk. The mitigation provided would need to be a lot more substantial. There is also an issue with the problem of increased traffic on Fairfield Road, where there is already an issue with air quality, I see no effort to combat this issue.
