Comments: The proposal of a green/renewable energy project that utilises an already existing substation on marsh lane is good idea. New Mills it;s always heading in the right directing looking and providing sustainable power for the local community this has been proved by installing the Archimedes screw in the Torrs. Having grown up in new mills. I am in full support of such ideas and supporting such a great dairy farm that my parents and still customers too and have been for many years who provide a lot of the community with quality local produce.
