Comments: App noHPK/2023/0193 construction of ESS Gow Hole New Mills

The location for this development is aesthetically and geographically inappropriate visible from virtually everywhere but virtually impossible to access without unnecessary earthworks.

The intended use seems totally spurious considering it's not linked to any sustainable green energy project and is intended to service the needs of Altrincham surely the residents of Hale Barns and Bowden would welcome this development on their doorstep seemingly it's for their benefit.

Its locality close to the Hope Valley rail line and local rivers is concerning as to what could happen if a mishap occurred probably causing the railway to be temporarily affected and the environment polluted.

I understand the development is contrary to policy EQ 2/3 of the High Peak Local Plan.
