Submission: Support

Comments: I am in full support of this project, As part of the move away from fossil fuels to sustainable and cleaner energy, projects of this nature have to be implemented to reach the Net zero 2050 target for a cleaner healthy future. The proposed site on Marshlane has been carefully selected due to its position with little if any impact to views due to the good established trees around the boundaries and the natural flow of the ground will keep it from the road view. The site is also isolated and away from any dwellings.

As part of the move to cleaner energy the 2 x storage units will back up the grid for local residents for when renewable power generation is at its lowest thus cutting energy prices.

As part of the outlined proposal the remaining area around the units will be re-wilded resulting in an increase of natural habitat for wildlife and conservation.

I support in full.
