Submission: Objection

Comments: I object to these plans as I live just at the top of the road from where the site will be, during the construction phase the traffic will increase for heavy plant and vehicles. Once a build would be completed the site would look hugely unattractive for green belt land and could potentially reduce the market value of the properties surrounding it. There is no evidence the site will produce green energy, just store it in large containers full of lithium ion batteries, which if damaged or faulty can suffer from thermal runaway, this in turn could start a chain reaction to spread to the other batteries, in turn creating a huge risk for the residents and the environment.
