Submission: Objection

Comments: This is an inappropriate development in the green belt, the proposals do NOT fall within any of the categories of acceptable development in the rural areas as set out in policy EQ3 of the High Peak Local Plan. There is also a risk to us local residents and the environment from the consequences of thermal runaway. Road access is inadequate to support construction of this development, increasing the danger to other road users. There will be noise pollution affecting many residents and wildlife, causing untold stress that could cause many health issues. Novus justifies this as a renewable energy project, yet this installation is not coupled to a solar or wind farm, novus has not provided any evidence that the proposals would specifically harness renewable energy for storage.

There is no justification for these proposals at this location.
