Good Evening,

We have been given a letter from Robert Langan MP in regards to the plans to build additional housing on Hogshaw Rec.

We don't agree with the plans as we feel that Buxton is becoming a little over populated. There's more traffic on the roads and this leads to extended periods of time spent in the car and as a result you have larger emissions in the area which will only increase should these plans go ahead. The government is trying to combat this by attempting to bring forward electric cars into every day life. But with more housing are we going to have the room to also support these facilities in the future? What's the plan there with each household having a charger for example?

As well as the environment impacts, this will have detrimental effect on leisure time in the area, we don't have many parks in Buxton anymore as they have all been consumed from things like this. All we have is the Pavilion Gardens. Buxton used to have many parks way back when, where children and families could enjoy the nice weather or walk their dogs. As well as parks, Buxton has nothing in terms of entertainment places, there's next to no cinema, no large chain fast food places for people to enjoy, as these would greatly increase the tourism and local economy to Buxton rather than that money going elsewhere in the UK.

My Son, my neighbour and I, oppose these plans.

Our names are below.

Tracey Sigley
Joan Newsome
Matthew Boundy

Best Regards.
