Submission: Support

Comments: We need energy storage systems such as this to ensure best use of wind energy, much of which is produced at night when there is little demand, and thus considerable waste. This is an unobtrusive scheme as it is situated between a railway line and an industrial estate so, once built, should hardly be visible. It is important to encourage schemes like this as it facilitates efficient use of our renewable energy resource to the benefit of all.

I support this scheme.
