[Dear Planning](#)

Application number	HPK/2022/0525	Application type	Full Planning - Small-scale MAJOR apps
Site address	Land Off, Graphite Way, Hadfield, Glossop, Derbyshire,	Proposal	Construction of Units for Industrial / Storage & Distribution uses, including associated parking areas.

COMMENTS:

The Environmental Health Department has no objection to the proposed development subject to the conditions set out below being applied to any permission granted.

Please be aware of the approval HPK/2016/0470 - STOR back-up power generation facility, which may effect the viability of this proposal.

Sensitive Use

The proposed development is on the site of a landfill, and on land where previous use suggests land contamination is plausible. For this reason and to protect human health and the wider environment condition 1 is recommended.

Noise

The noise impact assessment submitted in support of the application may be accepted.

- Nova Acoustics "Noise Impact Assessment" (ref: NP-008931-001), dated 22 January 2023

In light of the recommendations made within section 4 of the report the following conditions 2 to 4 are recommended.

Construction

The construction/demolition stage of the development could lead to an increase of noise and dust etc. experienced at sensitive premises and subsequent loss of amenity, for this reason conditions 5 to 10 are suggested.

CONDITIONS:

1. CL03 CONTAMINATED LAND

No development shall take place, with the exception of site investigation and remediation works until conditions 1a to 1d have been complied with. If unexpected contamination is found after development has begun, development must be halted on that part of the site affected by the unexpected contamination to the extent specified by the Local Planning Authority in writing until condition 1d has been complied with in relation to that contamination.

1a. An investigation and risk assessment, in addition to any assessment provided with the planning application, must be completed in accordance with a scheme to assess the nature and extent of any contamination on the site, whether or not it originates on the site. The contents of the scheme are subject to the approval in writing of the Local Planning Authority.

1b. If the site risk assessment indicates that potential risks exist, development shall not commence until a detailed remediation strategy to bring the site to a condition suitable for the intended use has been

prepared, and is subject to the approval in writing by the Local Planning Authority.

1c. Following completion of measures identified in the approved remediation scheme and prior to bringing the development into first use, a verification report that demonstrates the effectiveness of the remediation carried out shall be produced, and is subject to the approval in writing of the Local Planning Authority.

1d. If, during the course of development, any contamination is found which has not been identified in the site investigation, additional measures for the remediation of this source of contamination shall be submitted to and approved in writing by the local planning authority. The remediation of the site shall incorporate the approved additional measures.

2. NOISE – Sound Insulation

Prior to occupation of any unit the minimum sound insulation requirements set out in section 3.1 of the approved noise assessment (Nova Acoustics “Noise Impact Assessment” (ref: NP-008931-001), dated 22 January 2023) shall be implemented and thereafter retained for the life of the development.

3. NOISE – Deliveries

The delivery and despatch of goods at the proposed development shall not occur outside of the hours of 07:00 to 23:00.

4. NOISE – Plant Noise

The rating value of noise from any fixed plant or machinery at the development shall not exceed the following, when measured at (or calculated for) the façade of any noise sensitive premises

- a. day (0700-2300hrs) of 35dB(A)LAeq,16hrs
- b. Night (2300-0700hrs) of 33dB(A)LAeq,8hrs

All measurements shall be made in accordance with the methodology of BS 4142:2014+A1:2019 “Methods for rating and assessing industrial and commercial sound” and/or its subsequent amendments. Where access to the nearest sound sensitive property is not possible, measurements shall be undertaken at an appropriate location and corrected to establish the noise levels at the nearest sound sensitive property.

5. CDD01B - CONSTRUCTION AND DEMOLITION – DUST

No activity hereby permitted shall cause dust to be emitted beyond the site boundary so as to adversely affect adjacent residential properties and/or other sensitive uses and/or the local environment. In the event dust is caused to escape the site boundary the activity shall be stopped until sufficient dust suppression has been undertaken to prevent further escape. There shall always be the appropriate means and sufficient water resources on site for dust suppression. These should be made available for inspection when required by officers of the Local Planning Authority

6. CDD02 - CONSTRUCTION & DEMOLITION: WASTE DISPOSAL

Any waste material associated with the demolition or construction shall not be burnt on site but shall be kept securely for removal to prevent escape into the environment.

There shall be no fires lit on the site for purpose of disposing of demolition materials. Any open fires that arise shall be extinguished without delay.

7. NSD12 - BEST PRACTICAL MEANS

The best practicable means, as defined in Section 72 of the Control of Pollution Act 1974 to reduce noise and vibration from the site to a minimum, shall be employed at all times during construction.

8. NSD02B - NOISE CONSTRUCTION: PILING 2

If piling is necessary, a written piling options assessment shall be submitted to the Local Planning Authority, to demonstrate noise and vibration mitigation measures consistent with best practical means.

The assessment shall consider Environment Agency guidance (*Environment Agency (2001), Piling and Penetrative Ground Improvements on Land Affected by Land Contamination NC/99/73*) where land contamination is suspected or proven. No piling shall take place until the piling options assessment has been approved.

No piling shall take place outside the hours 09:00 hours to 16:00 hours Mondays to Fridays.

9. NS02A - CONSTRUCTION & DEMOLITION WORKS: TIME OF OPERATIONS

Unless prior permission has been obtained in writing from the Local Planning Authority, all noise-generating activities shall be restricted to the following times of operations.

- 07:30 - 18:00 hours (Monday to Friday);
- 08:30 - 14:00 hours (Saturday)
- No working is permitted on Sundays or Bank Holidays.

In this condition, a noise-generating activity is defined as any activity (for instance, but not restricted to, building construction/demolition operations, refurbishing and landscaping) which generates noise that is audible at the site boundary.

10. CDD14 - ON SITE RADIO

During construction/demolition phases amplified music and/or radios shall not be audible beyond the site boundary.
