Comments: Dear Mr Haywood, ref:HPK/2023/0193,

I object to the above planning application on the grounds that this is to be built on Green belt Land and the very special circumstances do not seem to have been demonstrated or fall within any of the current categories of acceptable development.

I believe construction of such a site in a rural area as this, with totally inadequate road access*, which is not designed with the local community in mind is complete inappropriate. Furthermore, this is not a green renewable project, as the battery storage facility being built is not fed from any wind or solar farms? If this is indeed to support the stabilisation of energy supplies for Altrincham, why is not being built there? In addition there have been issues relating to such installations, with thermal run away, as BESS fire in Liverpool.

*The junction between marsh lane, the A6 and Yeadsley road are already heavily congested, with many local residents using Marsh lane to bypass A6 congestion, especially for the school run to new mills high school.

In summary I fundamentally object to such a wholly inappropriate installation.

Yours Sincerely

David Fear
