Submission: Objection

Comments: I am concerned about this proposed development for a number of reasons.

Access to the site from either Marsh Lane end or Station Road end is very restricted. Although it is not a major road, it is a busy one and there are always cars parked at the side of the road, making it difficult even for my little Aygo let alone large vehicles to pass safely. Access from Furness Vale end involves crossing the railway track which is always needing repair, and it is an extremely tight corner at the bottom of Station Road.

I do not feel that the site would be at all appropriate on an area of Green Belt land.

I do not understand how this can be considered a renewable energy project. As far as I can see, it is merely a storage site and not a producer of energy.

I have concerns about the health risks to local residents and the detrimental affect on the environment.

The site is not even to provide any benefit for the local area, but for the Altrincham area. Surely it would make more sense to build this facility nearer to there.

I therefore strongly object to this application.
