Submission: Objection

Comments: As a resident of 10 Charles Street since July 1999, we have suffered the devastating effects of flooding on various occasions during heavy rainfall. The worst one was in 2019 when the continued volume of water forced through the culvert which passes under the roads and dwellings on Lightwood Road, Charles Street and Ash Terrace, has caused significant damage to the walls of the culvert, resulting in the potential of the collapse of some of those dwellings requiring emergency evacuation to temporary accommodation, causing the stress of potentially losing treasured possessions and pets which had to be left behind. collapse was thankfully avoided by an expensive and emergency repair carried out by the authorities.

The stress, worry and sleepless nights resulting in the very regular flood alerts given every time we have heavy rainfall is indescribable, not to mention the struggle to sell or let properties in that area due to the towns knowledge of the existing problem before any additional development takes place.

Should the planning be granted for this construction to go ahead, the additional run off of water diverted into the already struggling nunbrook water course would have a devastating effect on the existing dwellings already at significant risk from an already struggling structure. Please please consider the peril and stress you would be adding to existing residents, property owners and tenants before allowing this to go ahead
