Mr Ben Haywood
Head of Development Services
Town Hall
Buxton
SK17 6EL

Dear Mr Haywood,

Application No. HPK/2023/0193 - Construction and Installation of an Energy Storage System at Marsh Lane, Gowhole, New Mills, Derbyshire, SK23 7QE.

I wish to object to the above planning application.

The reasons I object are:-

* There is no justification for these proposals at this location.

* It will not help to reduce local residents' energy bills. We understand from the community consultation in August 2022 that the purpose of this installation would be to provide improved supply stability in the Altrincham area, where rich people live.

* This is "inappropriate" development in the Green Belt; "very special circumstances" have not been demonstrated.

* Road access is inadequate to support construction of this development. Construction would take six months, during which time heavy goods vehicle movements would disrupt the local road network, in particular at the tight junctions at the two ends of Marsh Lane/ Station Road, onto Church Road in New Mills and the A6 at Furness Vale.

Yours sincerely

Mrs P A Gilbert.
