Subject: RE: HPK/2023/0061 Bridgemont - waste comments

Good Afternoon,

I refer to the above planning application.

At this point I cannot support this application as I do not feel that the waste collection arrangements are suitable for the following reasons:

1. The Collection vehicles will not access properties where there is block paving. Residents will be required to present their wheel bins for collection where the block paving meets the normal road surface. From the plans it would suggest that the road surface, labelled as shared, would not be suitable for a 26T RCV to drive over and turn without causing damage to the road surface. Therefore all bins would need to be presented at the point where the shared surface meets the road that is intended to form part of the adopted highway. This area is not sufficient.
2. All properties must have suitable outside storage for at least 3 wheel bins. The current plans indicate that some properties have very little outside space where bins could be stored.

Kind regards
Martin
