Good Afternoon

I write in connection with the above application which seeks the discharge of Condition 6, Condition 8, and Condition 12 in relation to DET/2021/0002.

In light of positive comments from Derbyshire Wildlife Trust and the Environmental Health Officer, I am happy to confirm that Conditions 6 and 8 are hereby formally discharged in strict accordance with the information submitted as referenced within the relevant consultation responses.

I will not however be able to discharge Condition 12 until I have Elevation Plan that clearly annotate which part of the building will be finished in which material. This should be relatively straight forward, and I look forward to receiving these plans to hopefully allow Condition 12 to be discharged in the near future.

Kind Regards
