Comments: I have some specific concerns that I hope will be addressed.

Firstly, while I acknowledge that the project has minimal visual impact, it's important to highlight that the original construction seems to possess the best aesthetic fit for the area.

However, I do have reservations regarding the potential noise disturbance during the construction phase. As a resident, I am concerned about the potential disruption to the local area and the impact it might have on the quality of life for those nearby.

Additionally, the parking arrangements during construction, particularly for contract workers, is a concern. Ensuring that these workers park in suitable areas and do not cause too much inconvenience to residents is crucial for the smooth progress of the project and the local residents' daily life.

I hope these issues can be addressed and managed effectively to ensure a harmonious construction phase and a positive outcome for all involved.
