Hi James,

The new sample appears to be a bright pavement slab. This will not have the correct dimensions for a walling stone, nor will it be similar to the existing masonry by way of scale or appearance.

See image on Heritage Statement page 1. The ATM appears to cut across the cill detailing of the original reveal. Consequently it appears the pavement slab will become one large bright square plugging up the gap? This does not align with their statement that all external works will match existing finishes.

I feel as though something has gone amiss somewhere.

What are your thoughts?

Thanks
