Comments: This change of use and associated works has already been completed. Since the removal of trees and bushes the whole area acts like an amphitheatre so noise is a concern as all noise is amplified also traffic fumes are a concern these have increased due to the lack of natural filtration from the trees and bushes having been removed. Woodside Street is effectively a single track residential street and has enough heavy traffic for such a small area an increase in traffic is not welcomed and certainly not able to withstand heavy large deliveries such as the shipping containers again noise and air quality issues are of great concern
