Proposal

The proposal consists of re-covering the flat roof in two areas of the building and renewing window units and sill heights to accommodate cut to falls insulation. The flat roofs being re-covered are located to the rear of the school building. The new covering would consist of a cold applied roofing system on cut to falls insulation. The combined roof alteration covers approximately 147m2. The proposal would also include the installation of new fascia boards, roof lights and ventilator units and the removal and re-bedding of coping stones.

I have assessed the proposal against Section 55 of the Town and Country Planning Act 1990 and consider the roofing scheme to be a 'building operation', therefore the proposal is 'development' as set out in Section 55 of the aforementioned Act.

I have also considered this proposal against Schedule 2 of the Town and Country Planning General Permitted Development Order 2015 (as amended), Permitted Development Rights, Part 7, Class M; extensions etc for schools, colleges, universities, prisons and hospitals.

Paragraph M.1 b(a) states that development is not permitted if 'in the case of a school, where any land adjacent to the site is used for a purpose within Part C of the Schedule to the Use Classes Order (residential purposes), if any part of the proposed development is within 5 metres of the boundary of the curtilage of that residential land'. The roof being re-covered abuts the site boundary; the adjacent property is residential in nature. Therefore, the proposed development is situated within 5m of the curtilage of residential land and consequently an application for planning permission will be required.

As the development relates to roofing works, it is advised that the developer takes necessary precautions to avoid potential disturbance to bats (a protected species) and nesting birds.

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
