Good Morning,

Please find below comments from AES in relation to Waste Collection.

1. The Bin Store for the apartments must be of a suitable size to accommodate the following:
If Residents are to have ownership of their own bins each apartment is entitled to 3 wheel bins so the store must be able to house 18 individual wheel bins or
If the House Builder is to provide communal bins to the residents the bin store must be able to accommodate as a minimum 4 large (1100ltr) wheel bins. It must be noted that the responsibility for the bin store will remain with the house builder or subsequent maintenance contractor.
The doors to the bin store must be of a suitable design so that bins can be removed easily and there must be space for the operatives and residents to move around the store to deposit waste without the need to move bins around.
2. The Collection vehicles will not access properties where there is block paving. Residents will be required to present their wheel bins for collection where the block paving meets the normal road surface.
3. All properties must have suitable outside storage for at least 3 wheel bins (except for apartments as detailed above).

Kind regards
Martin
