Submission: Neither

Comments: Dear Sirs

I write in connection with the above planning application.

The planning application appears to be in relation to a proposed tank which will be located directly opposite my house. There is no mention in the planning application with regard to two issues which directly affect me (a) likely noise resulting from / increasing due to the development and (b) the visibility of the development from my house.

I must say that I am already very disappointed with Carpenter with regard to both. Over the winter, well before the planning application was submitted and without consulting the row of houses directly opposite the site (of which my house is one), Carpenter cut down a number of trees and thinned the vegetation which had previously provided an effective screen obscuring the view of the factory and the noise emanating from the same. The result has been that the factory (including the night time security light) has become more visible than it was.

I would therefore hope (and perhaps expect) that if this planning permission is granted that Carpenter commit to re-vegetating the area and providing an effective visibility screen to re-establish the prior position.

Yours sincerely

Daniel
