

Appendix 3: Census and Directories Details

Date	Name	Detail
1876 Post Office Directory	Dickson, Thomas	Corbar Hill House
1895 Kelly's Directory of Derbyshire	Beckett Jn. Hampden,	Corbar Hill House
1901 Census 'Corbar Hall'	John H. Beckett (45) Emily Beckett (43) Hamden Beckett (21) Margarita Beckett (20) Mariah Beckett (17) Doris G Beckett (16) Ann Beckett (13) Olga Beckett (7) Annie Stevenson (43) Annie Barnett (27) Eliza Mors (25) Elizabeth A Mors (21)	Head, Manufacturing Chemist Wife Son Daughter Daughter Daughter Daughter Daughter Servant, Cook Servant, Housemaid Servant, Housemaid Servant, Nurse
1912 Kelly's Directory of Derbyshire	Wye House Asylum	Wye House, Corbar Road
1925 Kelly's Directory of Derbyshire	Wye House Mental Hospital	Wye House, Corbar Road
1941 Kelly's Directory of Derbyshire	Wye House Mental Hospital	Wye House, Corbar Road

Appendix 4: Heritage Impact Assessment Methodology

The impact of the proposed development has been assessed using a cultural heritage impact assessment methodology based upon the International Council on Monuments and Site (ICOMOS) Guidance on Heritage Impact Assessments, a methodology commonly used to assess heritage impact. The significance of the impact of the proposed development is based on the value or sensitivity of the heritage asset and on the magnitude of the impact on that heritage asset. The criteria used for assessing value, magnitude of impact and significance of impact are set out in three tables below. These impacts may be either adverse or beneficial. These tables consider differing types of heritage assets: archaeological attributes, built heritage or historic urban landscapes, historic landscapes and intangible cultural heritage or associations.

Assessing Value of Heritage Assets

The value (significance) or sensitivity of a heritage asset is assessed based on existing national and local statutory designations, guidance such as the Historic England Listing and Scheduling Selection Guides and professional judgement based on research and site surveys.

Table 1: Assessing Value of Heritage Assets

Asset Grading	Archaeological Attribute	Built Heritage or Historic Urban Landscape	Historic Landscape	Intangible Cultural Heritage or Associations
Very High	Sites of acknowledged international importance inscribed as WH property. Individual attributes that convey OUV of the WH property. Assets that can contribute significantly to acknowledged international research objectives.	Sites or structures of acknowledged international importance inscribed as of universal importance as WH property. Individual attributes that convey OUV of the WH property. Other buildings or urban landscapes of recognised International importance.	Landscapes of acknowledged international importance inscribed as WH property. Individual attributes that convey OUV of the WH property. Historic landscapes of international value, whether designated or not. Extremely well preserved historic landscapes with exceptional coherence, time depth, or other critical factors.	Areas associated with Intangible Cultural heritage activities as evidenced by the national register. Associations with particular innovations, technical or scientific developments or movements of global significance. Associations with particular individuals of global importance.
High	Nationally-designated Archaeological Monuments protected by the State Party's laws. Undesignated sites of the quality and importance to be designated. Assets that can contribute significantly to acknowledged national research objectives.	Nationally-designated structures with standing remains. Other buildings that can be shown to have exceptional qualities in their fabric or historical associations not adequately reflected in the listing grade. Conservation Areas containing very Important buildings. Undesignated structures of clear national importance.	Nationally-designated historic landscape of outstanding interest. Undesignated landscapes of outstanding interest. Undesignated landscapes of high quality and importance, and of demonstrable national value. Well preserved historic landscapes, exhibiting considerable coherence, time-depth or other critical factors.	Nationally-designated areas or activities associated with globally-important Intangible Cultural Heritage activities. Associations with particular innovations, technical or scientific developments or movements of national significance. Associations with particular individuals of national importance.

Corbar Hill House, Corbar Road, Buxton: Heritage Statement

Medium	Designated or undesignated assets that can contribute significantly to regional research objectives.	Designated buildings. Historic (unlisted) buildings that can be shown to have exceptional qualities or historical associations. Conservation Areas containing buildings that contribute significantly to its historic character. Historic townscapes or built-up areas with important historic integrity in their buildings, or built settings.	Designated special historic landscapes. Undesignated historic landscapes that would justify special historic landscape designation. Landscapes of regional value. Averagely well preserved historic landscapes with reasonable coherence, time-depth or other critical factors.	Areas associated with Intangible Cultural heritage activities as evidenced by local registers. Associations with particular innovations or developments of regional or local significance. Associations with particular individuals of regional importance.
Low	Designated or undesignated assets of local importance. Assets compromised by poor preservation and/or poor survival of contextual associations. Assets of limited value, but with potential to contribute to local research objectives.	"Locally Listed" buildings. Historic (unlisted) buildings of modest quality in their fabric or historical associations. Historic Townscape or built-up areas of limited historic integrity in their buildings, or built settings.	Robust undesignated historic landscapes. Historic landscapes with importance to local interest groups. Historic landscapes whose value is limited by poor preservation and/or poor survival of contextual associations.	Intangible Cultural heritage activities of local significance. Associations with particular individuals of local importance. Poor survival of physical areas in which activities occur or are associated.
Negligible	Assets with little or no surviving archaeological interest.	Buildings or urban landscapes of no architectural or historical merit; buildings of an intrusive character.	Landscapes little or no significant historical interest.	Few associations or ICH vestiges surviving.
Unknown potential	The importance of the asset has not been ascertained.	Buildings with some hidden (or inaccessible) potential for historic significance.	n/a	Little is known or recorded about ICH of the area.

Adapted from ICOMOS Guidance on Heritage Impact Assessments (2011)

Assessing Magnitude of Change or Impact

The magnitude of change or impact is assessed based upon a detailed understanding of how and to what extent the proposed development might impact the specific type of heritage involved. It is necessary to have an understanding of the contribution of the setting to the value of the heritage asset as well as an understanding of the key elements or components which contribute to the value or significance of the asset to be able to determine the magnitude of impact.

Table 2: Assessing Magnitude of Change or Impact

Impact Grading	Archaeological Attributes	Built Heritage or Historic Urban Landscape Attributes	Historic Landscape Attributes	Intangible Cultural Heritage Attributes or Associations
Major	Changes to attributes that convey OUV of WH properties. Most or all key archaeological materials, including those that contribute to OUV such that the resource is totally altered. Comprehensive changes to setting.	Change to key historic building elements that contribute to OUV, such that the resource is totally altered. Comprehensive changes to the setting.	Change to most or all key historic landscape elements, parcels or components; extreme visual effects; gross change of noise or change to sound quality; fundamental changes to use or access; resulting in total change to historic landscape character unit and loss of OUV.	Major changes to area that affect the ICH activities or associations or visual links and cultural appreciation.
Moderate	Changes to many key archaeological materials, such that the resource is clearly modified. Considerable changes to setting that affect the character of the asset.	Changes to many key historic building elements, such that the resource is significantly modified. Changes to the setting of an historic building, such that it is significantly modified.	Change to many key historic landscape elements, parcels or components; visual change to many key aspects of the historic landscape; noticeable differences in noise or sound quality; considerable changes to use or access; resulting in moderate changes to historic landscape character.	Considerable changes to area that affect the ICH activities or associations or visual links and cultural appreciation.
Minor	Changes to key archaeological materials, such that the resource is slightly altered. Slight changes to setting.	Change to key historic building elements, such that the asset is slightly different. Change to setting of an historic building, such that it is noticeably changed.	Change to few key historic landscape elements, parcels or components; slight visual changes to few key aspects of historic landscape; limited changes to noise levels or sound quality; slight changes to use or access; resulting in limited change to historic landscape character.	Changes to area that affect the ICH activities or associations or visual links and cultural appreciation.
Negligible	Very minor changes to key archaeological materials, or setting.	Slight changes to historic building elements or setting that hardly affect it.	Very minor changes to key historic landscape elements, parcels or components; virtually unchanged visual effects; very slight changes in noise levels or sound quality; very slight changes to use or access; resulting in a very small change to historic landscape character.	Very minor changes to areas that affect the ICH activities or associations or visual links and cultural appreciation.
No change	No change.	No change to fabric or setting.	No change to elements, parcels or components; no visual or audible changes; no changes in amenity or community factors.	No change.

Adapted from ICOMOS Guidance on Heritage Impact Assessments (2011)

Assessing the Significance of Impact

The table below, Assessing the Significance of Impact, uses a matrix to combine the value of the heritage assets with the magnitude of impact. This significance of impact can be either adverse or beneficial. An impact of major adverse would equate to an assessment of substantial harm, as defined in the NPPF paragraphs 206-207. Other assessments of adverse impact would equate to less than substantial harm as defined in the NPPF paragraph 208.

Table 3: Assessing the Significance of Impact

Value of Heritage Asset	Scale & Severity of Change/Impact				
	No Change	Negligible change	Minor change	Moderate change	Major change
For WH Properties Very High – Attributes which Convey OUV	Significance of Effect or Overall Impact (Either Adverse or Beneficial)				
	Neutral	Slight	Moderate/ Large	Large/Very Large	Very Large

For Other Heritage Assets or Attributes	Significance of Impact (Either Adverse or Beneficial)				
Very High	Neutral	Slight	Slight/ Moderate	Large/very Large	Very Large
High	Neutral	Slight	Slight/ Moderate	Moderate/ Large	Large/Very Large
Medium	Neutral	Neutral/Slight	Slight	Moderate	Moderate/ Large
Low	Neutral	Neutral/Slight	Neutral/Slight	Slight	Slight/ Moderate
Negligible	Neutral	Neutral	Neutral/Slight	Neutral/Slight	Slight
