Submission: Support

Comments: Whole heartedly support this application. Without outdoor spaces which provide fitness for the community, people are unable to access physical and mental well-being spaces. Outdoor exercise and improvements in mental health are backed by extensive scientific evidence.

Prior to fitness in mind taking over this space was wasted and there was rubbish everywhere. It is a building that has been empty for a period of time, which was an eyesore for the community.

It is important that the council priorities spaces where people are able to invest in their health, which has a direct impact on lessening the burden on public services resources.

The times this space is used causes minimal impact to those around it.
