Comments: We wish to advise that the Owners have raised the level of the car park area approx. 2 metres from its original level with the result they are able to look directly down into our property thereby denying our right to privacy.

In addition, the present retaining wall has been built in such a fashion that it is now placing considerably weight against our own boundary wall with this property and we have major concerns that there is a significant danger of the wall collapsing.

We have seen no evidence of footings being placed to support the concrete blocks already in situ and have grave concerns that additional blocks being placed alongside the boundary will result in the boundary wall becoming unstable.

There is no obvious sign of drainage from the carpark area and believe that it is left to merely drain down towards the boundary wall between the two properties thereby undermining the integrity of the said wall.
