Submission: Neither

Comments: The Application states that the replacing of the old retaining wall with concrete interlocking bricks was completed on 30/11/2022. However the Site Plan, Section B-B, shows the concrete wall with the description "Brick Faced Concrete Block", which is NOT YET COMPLETE. I am sure that this is just a delay until planning permission is granted but I think this completion is necessary for the new wall to be in keeping with the residential nature of the neighbourhood. Otherwise the concrete blocks seem to be a strong solution to protecting the site though currently look overly industrial.
