Submission: Neither

Comments: Thank you for the opportunity to comment on this application. We have no objection to the work being carried out as they are essential for safety. However, we find the application extremely short on detail about its impact. In the interests of transparency and to enable residents and walkers to make alternative plans, we believe the Council should insist on the provision of additional information. This should cover the following

- a) what is the alternative route that is expected to be used during the closure of the bridge and the footpaths?
- b) what additional risks will users be exposed to whilst the bridge is closed and the alternative routes are being used?
- c) when are the works scheduled to start?
- d) how long will the bridge be shut for?
- e) what steps will be taken to minimise the closure of the footpath (eg will there be periods when the bridge can be partially opened while works continues on one side, allowing pedestrians to cross using the other side)?

We hope that answers to such questions will be made widely available so that all may be properly informed
