Comments: Surely this application to build a 75ft+ mast and 7 comms boxes in the middle of a field ,that is in the centre of a vista from a conservation area is not serious?

Recently a village property owner was turned down planning permission for trying to fit a velux window in the loft!

There is not a single decent reason that this communication tower and associated hardware should be fitted in this field.

Apparently it will be able to be seen from every house in Padfield village, at best this is totally inappropriate. Surely this is not acceptable in a rural village?

We already have a huge comms tower on top of redgate in the village, we do not need another within such a short distance and within such a prominent position
