Submission: Objection

Comments: We object most strongly to this application. The size of this proposed development will be catastrophic to the immediate area. The surrounding area will be Grossly, and negatively affected by such a development. The houses will be acutely, and badly affected in the extreme. We will be totally overpowered by this proposition. The idea of a 10 metre high extension on top of land that is already raised, will be absolutely detrimental to our everyday lives. The Eastern side of this development will literally be just a few feet from my window and as I hope you will agree, totally unacceptable, causing massive restriction of light, as it will be towering above us. To use the comparison of Street Crane and the council buildings, is totally unfounded and irrelevant to us as these are industrial units not encroaching on housing. You do not mention how we will be protected during the proposed demolition as this will cause environmental suffering from dust and asbestos residue that is present within the current building. Furthermore, the comments from the ecological survey in January this year regarding the wildlife, I can assure you that there is a colony of Mistral Bats abundant from this building. Thank you for reading this, and to conclude, if this proposed development should be approved it will affect our lives in the in the gravest way imaginable.
