

FlushSash
FlushSash

Let your home be as Individual as you are

The FlushSash is available in nineteen colours to perfectly personalise your property. Each colour and woodgrain has been designed to look just like traditional stained or painted timber and will require little or no maintenance other than an occasional wipe with a damp cloth.

You can also choose different finishes for the inside and outside of your property.

For example, you might choose a warm timber effect for the outside, such as 'Irish Oak', and opt for clean, bright White for the interior. You might even decide to specify a particular colour to match your kitchen - just speak to your installer about all the possible options.

Pick a colour

FlushSash frames come in a range of 19 colour options designed to look like stained or painted wood.
