Submission: Support

Comments: I and my family fully support the planning for a new phone mast to be put up in harpur hill. The WiFi in this area is already really poor and the phone signal is none existent meaning if our WiFi is down (which is regular on the new build site we live on) we are unable to contact anyone or be contacted which is not a nice situation to be in. It also has a big impact on our kids school work, meaning our 13 year old regularly has to go to library just to make sure he can get his homework sent in on time. Which when starting his GCSE's next just isn't fair on him, so something needs to be done to bring harpur hill into the 21st Century especially with all the extra housing that's been allowed to be built in the area.
