Submission: Objection

Comments: I live in the house at the bottom of Hillhead Lane. Throughout December 2023 - present we have experienced significant and damaging flooding to our property each time it rains. I have photos and videos of the materials stored by Lomas Distribution at the top of Hillhead Lane, washing down the hill and blocking the drains. The water then, with no where to go, enters into ours and our neighbours gardens and houses. It leaves behind silt and is an environmental hazard. It also floods the main road which causes risk of vehicles aquaplaning and injury to civilians.

It was myself who first discovered Lomas to be storing this material and sent in the photographic evidence to the local authority which was then flagged as them storing it without permission. To say I am disappointed that they have been able to apply to store the material, after months of my neighbours and I sending in emails/videos/photos showing the damage it has caused, is an understatement. The high levels of stress my neighbours and I have to experience each time it rains; waiting to see how much damage will be caused to our homes (some of which young children live in) this time. If the material is to be stored up there then it needs to be stored inside only and with safety nets/measures in place to stop any material washing down the hill.

I also believe Lomas should take responsibility for the damage caused and pay for the repairs to our properties.
