Submission: Objection

Comments: Firstly, the proposed ECO Center backs onto my garden which has a direct impact on myself and my family, not only with the parking and access restrictions, but also my privacy. I have lived here for approximately 16 years, with my young family where we have enjoy exploring the paths in the moorland around the back, which have been since been closed off by the Brock family.

The proposal submitted online differs greatly from the information provided to the residents previously - we feel this is a backdoor way of obtaining the required permissions to set up the center permanently. The proposal is based on a lot of presumptions, such as a majority will car share, there is no guarantee this will happen.

Parking in the area is at a premium, whereby the addition of eco facility will only exacerbate the issue, especially during term time. The alternatives suggested based on a simple glance at one particular point of the day (not a traffic survey) - is not a true reflection of the parking issue in the village.

It is concerning the number of supportive applications for a "early years" educational facility in the area, where the proposal suggest this is a once a year opportunity. The area is not suitable for a early years setting, especially with the fall from height risks from the disused quarry.

I agree with all of the objection comments previously submitted on the portal.
