Submission: Objection

Comments: We have lived on Back Lane for 39 years.

Throughout that time the lane has always been difficult to negotiate owing to the sharp beds, the steepness and the narrowness.

If a car is parked it reduces the lane to single track and because of the sharp bends, cars coming in the opposite direction cannot be seen.

Despite the assurances from the applicants that cars will not be parked on Back Lane, who is going to police this as clients will soon tire of walking up the steep lane.

The whole development is in a conservation area, how can this be allowed?

There is also a public right of way, as can be verified on the O.S map around the quarry.

Also, on the applicants' map of the area, which incidentally includes the land owned by us and our neighbours, how can this development be even considered? Depriving the many locals of a long-standing amenity for the benefit of a few paying customers

Should definitely be rejected.
