Civil Parish NEW MILLS, HIGH PEAK, DERBYSHIRE

Activity Objective, Description and Sources

Description

An archaeological evaluation, building survey and watching brief was carried out prior to a proposed development to improve sewage management along the west bank of the River Sett. The building survey recorded the standing remains of the mill, while a series of test pits and a trial trench revealed walls associated with the original cotton mill as well as modifications of the internal structure of the later mill building.

Administrative Areas

Civil Parish NEW MILLS, HIGH PEAK, DERBYSHIRE

Activity Objective, Description and Sources

Description

A watching brief was undertaken on the excavation of rainwater drains and two soakaways to north and south of the church. Excavations revealed no buried structures, artefacts or human remains. It was concluded the work had no archaeological impact.

Administrative Areas

Civil Parish NEW MILLS, HIGH PEAK, DERBYSHIRE

Activity Objective, Description and Sources

Description

A watching brief was carried out during the construction of a hydro generator. The primary aim of the watching brief was to observe the removal of deposits from the site of the now demolished Torr Mill. An excavation trench approximately 6m in width was opened, exposing the southern half of the mill's wheel pit. Further significant features revealed within the trench included the original water inlet arch and the remnants of a second arch. The features probably relate to the construction of the mill in the late 18th century.
