Comments: It is interesting to note the item that Icontower have produced relates to a program "Weplan" this is not in anyway proof of requirement but what has been available - it's true name is Weplan Analytics - it does not produce data for the areas that a signal being unavailable and the perpetual. I am in favour of a mast that covers the entire area of Harpur Hill not unsystematic partial measures taken over a period of time, when the mast can be positioned in a location that covers all that require it. The coverage from June 2024 by Ofcom mobile checker - the Ward councillor and Icontower Acquisition Surveyor will not give formal assurance of actual coverage only a general statement " good screening will improve coverage for all operators" which is vague at best. It should be rejected and moved to a more sustainable location which icontower have indicated that this was not a problem and is available. There is also a requirement other than Mobile phones use but smart meters and RTI for buses services.
