Submission: Objection
Comments: I am injecting to this planning application for many reasons.

The environmental impact will be massive. The lose of habitat for many species,

An increase in flooding risks further down stream and through town.

Unknown chemicals currently lying in a stable form, being disturbed and released into the environment, whether by air or water.

Spreading Japanese knotweed, a notifiable plant, along the water course, and also through removal and spreading of the top soil.

A massive reduction in air quality, especially on Fairfield road, which is already above legal limits.

Continual infill of any green space around town, destroying the very beauty of the town and it's setting.

An increase in demands on doctors, dentists, school places, road infrastructure, local sewage systems
