Submission: Objection

Comments: This property has not been upgraded acoustically and is adjoining and amongst residential properties with small children living there, there has been ongoing issues with it operating 24 hours a day with significant noise arising from the dropping of heavy weights on original floors and loud music being played. The property really needs thermal and acoustic upgrade in line with other properties on the quadrant in order to not hinder the day to day lives and sleep patterns of neighbours.

Has a noise impact assessment been carried out when the premises is operating as proposed, how will it be managed to ensure adherence to operating times as it is advertised as keypad entry 247
