Hi Hannah

I've had a look over the plan and I have the following comments:

There are no details about how the planting will be established or requirements for replanting if damaged or failed, but then the condition does not require this.

Species choice:

All species have the potential to be small scrubby trees, which seem a poor choice for a site with high sided vehicles.

Sorbus aucuparia also does not do well next to hard standing, they can't handle the reflected heat and usually die before reaching maturity.

I suggest the following tree alternatives:

Acer campestre William Caldwell or Elegent (both upright growing forms)

Alnus glutinosa

Carpinus betulus

Sorbus aria majestica

Tilia cordata Greenspire

The hedging choice appears to be appropriate.

Let me know if you still want to have a chat.

All the best
Craig
