Submission: Neither

Comments: This planning application appears to be in the boundary covered by the local plan. I am commenting to ask the council to consider how this planning application fits with the local plan with specific regard to the impact of the development on the peak district national park as there is a visual impact on the aesthetic of the Peak Park resulting from the development, both during the day and at night.

Also I am commenting to ask the council to consider any impact with regard to Climate Change especially as the council declared a climate emergency in 2019 - will there be increased carbon emissions from activity at the site and what if any offset measures are being put in place? Also, will this have an impact on the local environment and biodiversity as the site sits adjacent to important environmental habitats.

Travel demand - will this increase the demand for travel and put pressure onto existing infrastructure?

Please could this be considered at a committee by HPBC so that these considerations can be taken into account in conjunction with local elected representatives.
