21.10.2024

To Whom it may concern,

This letter is to confirm that Kirwin Construction Ltd, whilst carrying out the groundworks at the former Charlestown Works site in Glossop, were briefed on the potential for archaeological features to be present on site.

For reference, we were provided with the Written Scheme of Investigation, as prepared by Archaeological Research Services Ltd.

All works were carried out carefully, and workers were instructed that any finds should be reported to the site manager immediately.

I can confirm that no archaeological features or deposits were encountered during our time on site.

Yours faithfully

Wayne Kirwin
