Submission: Support

Comments: I fully support the proposal to installed a new cellular network mast at the site indicated in the application.

Mobile connectivity, including services that rely on cellular connections are none existent towards the lower part of Harpur Hill. Coverage around the High Peak meadow development has a 0% cellular range within most dwellings, with outdoor coverage barely available for telephone calls. WiFi connectivity is heavily dependent and when the Openreach network goes down there is no backup.

This application will benefit the entire community, along with the essential service users, such as the emergency services that use the Vodafone network.
