Submission: Support

Comments: I wholly support this. There is no phone signal where I live which can be problematic with work, schools and general day to day life (such as making drs appts).

I have two young children, and I have to travel away from home in order to call the school, or make drs appts. If there was an emergency at school and they needed to call me, they would be unable to do so. This also affects my work, as I am unable to make work calls from home, which is my primary place of work.
