Buxton

Submission: Support

Comments: I express my strong support for the installation of a mast in our area. As we move further into 2025, the lack of reliable mobile service here poses significant risks, particularly in emergency situations and for important communications that can affect the safety and well-being of residents.

Currently, the absence of mobile coverage in our region is a growing concern. Emergency services are heavily reliant on mobile networks to provide timely assistance during critical situations, whether it be health-related, fire, or other urgent matters. Without proper mobile service, individuals are left vulnerable, and the ability to call for help in times of need becomes severely limited. In addition, many people in our community rely on their mobile phones for day-to-day communications, work-related calls, and staying connected to family.

This service will not only benefit the local residents but also provide critical support to non-residents, contractors, and other individuals who frequently pass through or work in the area.

Currently, the lack of reliable mobile service poses significant challenges, particularly for contractors, delivery personnel, and others who depend on their mobile devices for communication and work-related purposes.
