Submission: Objection

Comments: Objection to this planning development. The size and height of the units proposed for this site are still unacceptable and would not be suitable for development on this land. There has been no consideration for the residence who live on Ashbourne lane and surrounding residential areas. Ashbourne Lane is an already congested and it would make it worse by increasing traffic to this site which has a restricted access onto a busy main road. There is only a one storey building still on this site with no visual impact to residence compared to what is being proposed. There has been no mention what these units working hours would be this could involve 24hours/7days a week? therefore, the whole area would be affected by noise level, light pollution from flood lights and security lights, seriously impacting on this residential area.
