Submission: Objection

Comments: Having read the amendments to the application I do not feel that my original objections have been addressed. The amendments do nothing to improve the road safety of the area which will be worsened as a result of this development. Changing to category E still leaves the people surrounding the development subject to noise, dust and light pollution as it is such a broad category. The area is simply not suitable for an industrial development. The new proposals do not address the loss of habitat for nesting birds or bats. It is my understanding that developments such as this should include provision for 10% Biodiversity Net Gain. I cant see how this proposal will provide that. Please see my original objections for further details.
