Subject: RE: HPK/2023/0192 - Land at Hogshaw, Buxton
Hi Rachael,

Air Quality

With regard to the air quality.

The applicant has now submitted an updated AQ screening assessment produced by Smith Grant LLP (Ref: R3258B attached) . The updated screening assessment includes far more detail and better justification for the applicability of the AECOM report and conclusions produced for the Hogshaw Roundabout (in 2020). This includes reference to recent trends in results being consistent with previous predictions in the AECOM (and HPBC) detailed assessments (note: the comment about the 2022 being the latest ASR is incorrect) and that these assessments were conservative in their nature at the time. These arguments are accepted.

It is therefore, now agreed that the development will unlikely have a negligible impact on the Fairfield air quality (at the time of construction) and no further conditions / assessments are required in this regard.

All the Best

Dan

Principal Pollution Officer
