Graphite Way, Hadfield**

Refuse Collection Statement

Date: Feb 2025

Introduction

In line with the new waste management guidelines issued by High Peak Borough Council, coming into force on 1st April 2025, commercial premises will be required to use separate bins for the following waste categories:

- Recycling Waste
- Food Waste
- Residual Waste

Separate bins will need to be provided for each waste category for each unit and it is mandatory for all businesses to segregate their waste accordingly.

Waste Bin storage areas will be provided, as shown on the proposed site plan, but each unit occupier will be responsible for organising their own waste collections. Details and specific requirements should be discussed with their own 3rd party waste collection company.

Waste Collection Frequency

The frequency of waste collection will depend on the nature of the business and the quantity of waste generated. This will be assessed on a case-by-case basis, and a tailored collection schedule should be established to suit each businesses requirements.

Important Notes

Non-compliance with sorting guidelines may result in missed collections or fines and possibly breach of planning conditions.

Further details on waste sorting and the collection schedule should be sought by the individual Unit Occupiers from their third party waste collection companies.

END.
