

Details for Discharge Condition 1 HPK/2024/0344

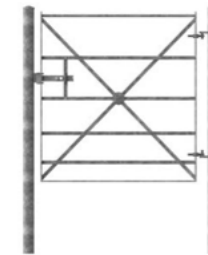

Area sown with BS Species Rich Wild Grass Seed - Creates a diverse wild grass meadow with this mix of nine attractive meadow grasses and provides vital habitat for a range of wildlife, including wild birds, small mammals and a large range of invertebrates. Sow at 20 grams per sq/m

Co-Op Field boundary

Mixed Native Hedging 180-200cm (5'11"-6'5") | - Troughs supplied in 1 metre length of instant hedging and are currently approx 6ft tall from the top of the rootball to the top of the hedge. They are a mixture of Beech, Hawthorn, Field Maple and Hazel but may also have some Spindle , Dogwood or Goat Willow. Planted adjacent to highway to replace mixed hedging removed to form entrance to temporary access road. NOTE – Final position of hedging TBC with NMTC as original pedestrian entrance may need to be repositioned away from entrance to car park.

Original ungated pedestrian entrance to Co-Op Fields (see image above) This was in a dangerous position on the corner of the entrance to the town hall rear car park.

Proposed position of Estate Single Leaf Gate C/W Posts - 1.2m High x 1.2m Wide - Galvanised (see image above) gated pedestrian entrance to provide safer access and use of the reinstated green space. Style of gate chosen to match existing vehicle gate to town hall car park.
