Submission: Objection

Comments: Whilst I support green and renewable energy, the idea to build BESS on greenbelt land in the Peak District National Park is, in my opinion, completely wrong. I have had the privilege to grow up in this area, and am heartbroken to see application after application put forward to bulldoze the small areas of green land we have left, with no regard for the local wildlife, public lands or the lasting impact it will have on the community going forward. I'm sure that there are far more suitable places for storage facilities already available, not on greenbelt land.
